

Zip Dairy Heaters

70 litre and 115 litre models

315 litre model

Zip Dairy Heaters are designed to give both hot water and boiling water for small and large dairies.

All models operate off single phase 10 amp wiring and require one cold water entry.

Smaller models, 70 and 115 litres, are manually filled, larger model, 315 litres, is fully automatic.

For boiling water just turn on special boiling switch half to one hour before boiling water is required.
